Experience

Machine learning engineer

Global Move (May 2024 – Present) | Tashkent, Uzbekistan (On-site)

- **Skills:** Python, C++, OpenCV, TensorFlow
- Built face-detection and liveness-detection systems for real-time applications.
- Conducted research on cancer detection using advanced machine learning models.
- Designed NLP models, including text-to-speech (TTS) and speech-to-text (STT) systems, for the Uzbek language.
- Developed and optimized AI models for diverse applications, ensuring robustness and accuracy.
- Conducted research on emerging AI technologies and contributed to publications and technical documentation.

Software engineer

Innobek, June, 2019 – May, 2024

Innobek (November 2021 – May 2024) | Tashkent, Uzbekistan (On-site)

- **Skills:** REST APIs, React.js, Web Applications, React Native, Next.js, Redux, Material UI, Tailwind CSS, Node.js
- Designed and developed scalable front-end solutions for web and mobile applications.
- Implemented backend services and APIs using Node.js, improving server performance and scalability.
- Improved team efficiency by introducing reusable components, adhering to SOLID principles, and writing clean, maintainable code.
- Led the team in adopting state-of-the-art technologies such as Next.js for improved SEO and performance.
- Enhanced system performance, reducing load times and improving responsiveness.
- Collaborated with cross-functional teams to deliver high-quality solutions on time.

Web Frontend developer

Dizipro (December 2021 – April 2023)

- **Key Projects:** Staffing application for 3D modeling companies.
- Built and optimized front-end admin interfaces using React.js, Next.js, Redux, and Material UI.
- Conducted unit and integration testing using Jest and Enzyme, achieving 90% test coverage.
- Improved team onboarding and productivity by creating detailed project documentation and mentoring junior developers.

EDUCATION

Najot Ta'lim

Field of study: Full-stack development

Duration: 06.2019-06.2020

Zero To Mastery Academy

Field of study: JavaScript: The Advanced Concepts

Duration: 09.2019-03.2020

Certificate: [Javascript Advanced](#)

Key Achievements

- Optimized a CRM system, reducing heavy report load times by 50% through caching.
- Decreased latency for read queries by 40% via efficient Redux Toolkit usage.
- Successfully delivered an e-commerce platform with a 70% SEO improvement using Next.js.
- Contributed to open-source projects, including online video chat systems and NPM libraries.
- Co-organized programming workshops for beginners and mentored junior developers.

Skills

- Frontend Development: JavaScript, React.js, Redux (Toolkit, Thunk), Next.js (SSR), React Native
- Backend Development: Node.js
- Machine Learning & AI: Python, TensorFlow, PyTorch, OpenCV
- CSS and Frameworks: CSS3, Tailwind CSS, Material UI, Bootstrap, Less, Sass
- Mobile Development: React Native, Expo/CLI
- Project Management & Collaboration: Git (GitHub/GitLab), Jira, Agile, Scrum, Trello, Notion
- Testing Frameworks: Jest, Enzyme
- Languages: English (IELTS 6.5), Russian (B2), Uzbek (Native)
